

E-Ticket Information

In an effort to go "green" The Magic Castle has gone "ticketless." Instead of tickets actually coming out of a game,

E-tickets are now added directly to your game card.

Going ticketless is easy. All you do is swipe your game card to play a game and any tickets that you win will be automatically added to your game card when your game is finished. All games have a **Yellow** digital display that will tell you how many tickets you have won. **Remember, on most games the E-tickets will be automatically added to your card. You will not need to re-swipe your card to claim**

E-tickets.

On Token Action Games with **The Blue Swipers**, you will need to swipe your card **AFTER** playing to claim your tickets

What are the benefits of the Ticketless System?

1. There will be no ticket jams.
2. Games will not run out of tickets.
3. There will be no waiting for a game attendant to un-jam tickets or add more tickets to a game.
4. You can skip the step of feeding your tickets into the ticket station.
